

Important Related Documents

for the

KSAR Open Registry

1. Why Register
2. Color Genetics
3. Traditional Flocks
4. Judges Guide

While not directly related to the registration process these four Important Related Documents are provided to assist in your quest for information on Karakul sheep.

Why Register A bit of motivation on registering your Karakuls—common-sense, down-to-earth reasons for the importance of breed certificates.

The next two are more scientifically-minded papers.

Color Genetics by Letty Klein presents in shepherd's terms, an easier-to-understand genetic outline of what makes Karakul lambs the colors they are.

Traditional Flocks by Deborah Hunter presents an understanding of Karakul Bloodline development, followed by a short summary of the registration process for sheep from isolated, multi-sire managed flocks. Developed since 2015, this was the Alliance's original policy paper; many parts were used in our new 2020 ***Registry Policy***, now outlined by subject.

Judges Guide Standard is last for accessibility, and makes an easy tear-off document. Consider presenting to your judge before showing, as many could use a refresher on the composition of excellent Karakul sheep.

Thank you for supporting your Karakul Shepherds Alliance!
