9.

Julia DeVlieg

Anakus Karakuls \*Isolated flock 2006-2021\* MBC (Multi-Bloodline Composite)

509.738.6310 Linebred on 5 major bloodlines from 1980s to 90s (all except Dawley);

[julia.devlieg@gmail.com](mailto:julia.devlieg@gmail.com) The Registry Flock (Stultz/Koch/Glotfelty), Ponte, Hagerman, Hindi, TAMU (San Angelo); Voluska (minor)

### Bloodline status currently unknown

*Ponte* Historical-Foundation bloodline - placed under the care of Dee Perera, Boonville, MO in 1999; less than 15 high-percentage Ponte sheep currently located.

*New Zealand* bloodline - Imported by Dee Perera, Boonville, MO in 2005, *Willowbank Marco*; last of semen used about 2015; young NZ offspring are producing in California, and a few grandsons remain still siring lambs throughout the US. The Alliance started to track NZ Karakuls in the US in 2020.

In our new [Registry Policy](#), Alliance Advisors designed an easy way to track NZ progeny in our population. When NZ influence is below 3%, sheep will then be counted as American Karakuls. KSAR will also internally track the 100% American Karakuls for The Livestock Conservancy.

## Karakul BLOODLINES Breeders

### Historic-Foundation: (20th century italics, 21st century blue)

1. *Hagerman (North-central NM) 1911, found 1986;*

Three Bloodlines descendant from Hagerman:

1. *Stultz/Koch/Glotflety (aka The Registry flock) extinct, blended with other bloodlines*
2. *TAMU San Angelo Research Station (West-central Texas) start date?, found late 1980s, dispersed 1992-94* [J Kamar](#) (Central OK) TAMU whites since 1995
3. [Onion Creek](#) (Central TX) isolated 2009 - 2014

4. *Dawley (Central NY) 1916, found 1997;*  
[Pine Lane Farm](#) (Southwest MI) line-bred 2014

5. *Hindi (Central NM) 1920s?-1940s, found late 1980s, 1st generation, Brahaim Hindi,*  
2nd generation Jamil Hindi, isolated up to 2008  
[Gabby](#) (Southeast NM) isolated 2008

6. *Ponte (North-central CA) 1941, found 1984;*  
close to extinct, only 5 to 10 high-percentage Ponte sheep currently located

7. *Dancer, Angie and Stan (Northern CA) 1970s?-1980s; linebred until Stan's death ~2007*  
[Peter Neverov](#) (North CA-OR border) isolated 2007

### Multi-Bloodline Composites:

#### Isolated

1. [Six Winds](#) (Central ID) Isolated 2005 to December 2020  
*Dispersed to three smaller flocks in California, Washington, and Idaho.  
The first two will breed Six Winds pure to maintain the bloodline.*
2. [DerStepanian](#) (Southeast MI) isolated Spring 2007
3. [Anakus](#) (Northeast WA) isolated Fall 2007 to May 2021

#### Line-bred

1. [J Kamar](#) (Central OK), bred for non-fading dark red fleeces since 1990; TAMU whites since 1995
2. Peter Davies Memorial, Turkana (Southeast NY), bred on Pine Lane Farm (PLF) Karakuls since 2001
